1981 Editorial Index

All major articles, published in Pit and Quarry during the 12-month period beginning January 1981 and ending December 1981, are indexed under appropriate subject headings. Plant stories, general articles, and reports of association meetings are in most instances listed under the materials or products principally involved. Articles concerning particular phases of operations are listed under such headings as blasting, drilling, maintenance, etc. The number following the month indicates the page on which the article begins.

AGRICULTURAL LIMESTONE

From National Association Leaders—1980 Review & 1981 Outlook 1/81 77

Aglime—a Business, Not a Service, Bruce W. Remick 5/81 79

BLASTING

Upgraded Blast Design Improves Fragmentation 4/81 64

Blast Vibration Analysis Provides Damage Control, Sid Levine 4/81 77

Uncertainties Stem From OSM Proposed Blasting Regulations, Deane Boddorff 4/81 90

Non-electric Blasting System Eliminates Misfires and Cutoffs 5/81 90

Society of Explosives Engineers Frowns on Bureau of Mines Report 8/81 83

Adjusting Blast Design for Best Results, S. S. Jenkins Jr. 9/81 98

The Time Factor in Blasting, L. C. Lang 10/81 114

Explosion-Containment Specs Mandate New Design Thinking, Fred Johnson 10/81 118
